

Film Fill for Cooling Towers

Midwest Cooling Towers thermal-formed cellular polyvinyl chloride (PVC) film type fill media is an excellent, cost-effective selection for your cooling tower.

Available in various mil thicknesses and heights, specially designed to meet the distinct needs of your particular application, whether that is new construction, emergency repair, thermal upgrade or reconstruction. Various configurations include the 1200 & 1900 series with cross corrugated flutes; designs with integral louvers & drift eliminators; and anti-fouling vertical flute designs.

Important features of Midwest Cooling Towers film fill media include:

- Sturdy PVC construction
- Highly efficient
- Self-extinguishing for excellent fire rating
- Easy, quick installation
- UV-protected

Midwest Cooling Towers film fill media meets or exceeds standards set by the Cooling Technology Institute (CTI).

OEM Replacement Parts

Midwest Cooling Towers is a complete cooling tower supply company, offering a wide range of products to the cooling tower industry since 1987. Our large selection of quality OEM (Original Equipment Manufacturer) replacement parts are compatible with most models and manufacturers of cooling towers and they offer a high quality, reliable, low-cost alternative to expensive original equipment parts.
